Maximiliano Nahuel Salto

I am a Backend Developer with 3 years of software development experience. Currently, I am working with Node.js and TypeScript in e financial app. I am passionate about exploring new technologies and tackling new challenges. I am particularly interested in blockchain and web 3, and have a strong understanding of design patterns, clean code, and security best practices. In my current role at Cocos Capital, an Investech, I am responsible for maintaining and developing new features in the company's application for operating regulated financial assets. I am passionate about solving problems and love the feeling of accomplishment that comes with finding creative solutions. Programming is more than just a job for me, it's a hobby that I am constantly investing in through training and education. I am a motivated and hardworking individual with a strong attention to detail. I am always looking for ways to improve and grow, both personally and professionally.
